2. Citations and explanations :

The following document have been considered for the purpose of this written opinion:

D1: KR 2001-97559 A

D1 relates to a method for deciding and concluding a price and amount simultaneously among a plurality persons in electronic commerce.

A member seller and a member buyer input a selling price/amount and a buying price/amount. A selling price is sorted in descending powers, an accumulated selling amount is recorded, and a buying price is sorted in ascending powers, an accumulated buying amount is recorded.

If the selling price is more than the buying price, it is judged whether a searching row is existed. If the selling price is identified with the buying price, a concluding price and a concluding amount are decided. If the selling price is not identified with the buying price and the search row is the initial row, a non-concluding is decided.

If the selling price is less than the buying price and the selling accumulating amount and the buying accumulating amount of the final row, a concluding price and a concluding amount are decided. If the selling accumulating amount is not identified with the buying accumulating amount of the final row, a concluding price and a concluding amount are decided.

Claim 1, 5 of the present invention are independent claims and most similar to the mentioned D1. Compared with D1, the claims of the present invention are characterized by determining the profitable price and amount using comparison between the selling price/amount and the buying price/amount.

But D1 does not use cumulative distribution and cumulative deviation. There not are the prior arts using cumulative distribution and cumulative deviation.

On that, the subject matter of claim 1, 5 is considered to involve an inventive step as being non-obvious over said document, and the subject matter of dependent claims 2-4, 6, 7 is also considered to involve an inventive step

Therefore the subject matter of claims 1-7 is considered to be novel, to involve an inventive step, and to be industrially applicable.
